

Virginia Tech New Business Building

Request for Subcontractor Proposals

The New Business Building is an approximately 95,000 square foot building housing the Pamplin College of Business. The project will be the second phase of the Global Business Analytics Complex connected to the recently completed Data & Decision Sciences Building. The building architecture continues the collegiate gothic theme on campus with Hokie stone and precast exterior. The interior program will be a mix of departmental suites, offices, conferences areas, a four-story atrium, along with a testing and production Kitchen (Hokie Lab).
